### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence Wechsler on February 26, 2010. The amendment is being done to more clearly recite that the identification keys are associated with specific events or users which store data in respective different memory regions.

The application has been amended as follows:

In the Claims:

12. (Currently amended) The electronic sphygmomanometer according to either of claims 7 or 14, further comprising:

a time measuring device,

wherein, a one of the light emitters corresponding to an associated one of said event identification keys that corresponds to a present clock time determined by the time measuring device, emits light.

13. (Currently amended) An electronic sphygmomanometer comprising:

a blood pressure measuring device that outputs a blood pressure value;

a display unit for displaying the blood pressure value;

user identification keys, each of said user identification keys corresponding to selectable manipulation thereof by a respective one of different users;

a memory having memory regions, a particular one of said memory regions being uniquely associated with a corresponding one of said user identification keys, the particular one of the memory regions being addressed in response to manipulation of a corresponding one of said user identification keys to allow storage of respective data for each of said different users in a different one of the memory regions by manipulation of the corresponding one of said user identification keys by the respective one of the different users to which the corresponding one of the user identification keys is allocated; and

light emitters each being disposed at, or proximate to, a respective one of said user identification keys, a one of the light emitters, associated with the corresponding one of the user identification keys being manipulated, emitting light while the blood pressure is being measured or displayed.

14. (Currently amended) An electronic sphygmomanometer comprising:

a blood pressure measuring device that outputs a blood pressure value;

a display unit for displaying the blood pressure value;

event identification keys;

a memory having memory regions for storing different events, a particular one of said memory regions being uniquely associated with a corresponding one of said event identification keys, the particular one of the memory regions being addressed in response to manipulation of a corresponding one of said event identification keys to

Art Unit: 3735

allow storage of respective data for each of said different events in a different one of the memory regions by manipulation of the corresponding one of said event identification keys; and

light emitters each being disposed at or proximate to a respective one of said event identification keys, a one of the light emitters, associated with the corresponding one of the event identification keys being manipulated, emitting light while the blood pressure is being measured or displayed.

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record to Nakazawa fails to disclose both user id keys and event id keys that are associated with particular memory regions, where the user and event id keys correspond to different users and events respectively, where use of these keys stores the corresponding user or event to the respective memory region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL D'ANGELO whose telephone number is (571) 270-7112. The examiner can normally be reached on Monday-friday 9-5 EST.
